Program & Capability Mapping: A Common Language to Organize Public Health Infrastructure at Any Scale

Azalee Hoffbauer, MPH - Public Health Workforce Analyst - They/Them

[Digital accessibility statement](#)

Why We Still Can't Answer Basic Questions About Our Workforce

What We Have Now

- Basic job titles from HR systems
- Fragmented data systems
- Siloed systems and departments
- Inconsistent terminology

What We Need

- Roles tied to programs and capabilities
- Multi-role visibility
- Shared schema
- Scalable, structured data
- Real-time, individual-level workforce data

“In order to build capacity, we must understand who makes up our workforce, what programs they work in, and their roles.”

A Simple, Adaptable Framework

Maternal, Child, Adolescent & Family Health	Environmental Health	Communicable Disease Prevention, Investigation & Control	Access & Linkage with Care	Chronic Disease, Injury Prevention & Behavioral Health Promotion
WIC Nurse Family Partnership Farm to Child Cavity Free at Three	Hazardous Materials Colorado Clean Cars Community Water Fluoridation	Zoonotic Diseases Expedited Partner Therapy COVID-19 Emerging Infections	SNAP HPSA Loan Repayment Medicaid	Communities That Care Quitline WISEWOMAN Project AWARE

Assessment & Planning	Communications	Policy Development & Support	Partnerships
Data Collector Lab Tech Epidemiologist City/Urban Planner	Comms Specialist Fundraising Manager Public Info Officer Webmaster	Legislative Assistant Policy Advisor Policy Compliance Specialist	Community Partner Liaison Outreach Specialist Org/Site Manager
Organizational Competencies	Emergency Preparedness & Response	Health Equity & Social Determinants of Health	Additional Important Services
Program Manager HR Technician Auditor IT Specialist	EPR Liaison Emergency Dispatch City Emergency Manager	Promotora Training Specialist Community Health Worker	Logistic Manager Case Manager Social Worker Health Care Workers

A Simple, Adaptable Framework

Person

Service
Area

Program

Capability

Role

- Works with any agency
- Piloted at state & local level
- Built to reflect real people doing real work

Data Isn't the Problem, The Structure Is

“Data” isn’t abstract, it’s embedded in daily work

Workforce data isn’t a tech issue, it’s a shared understanding issue

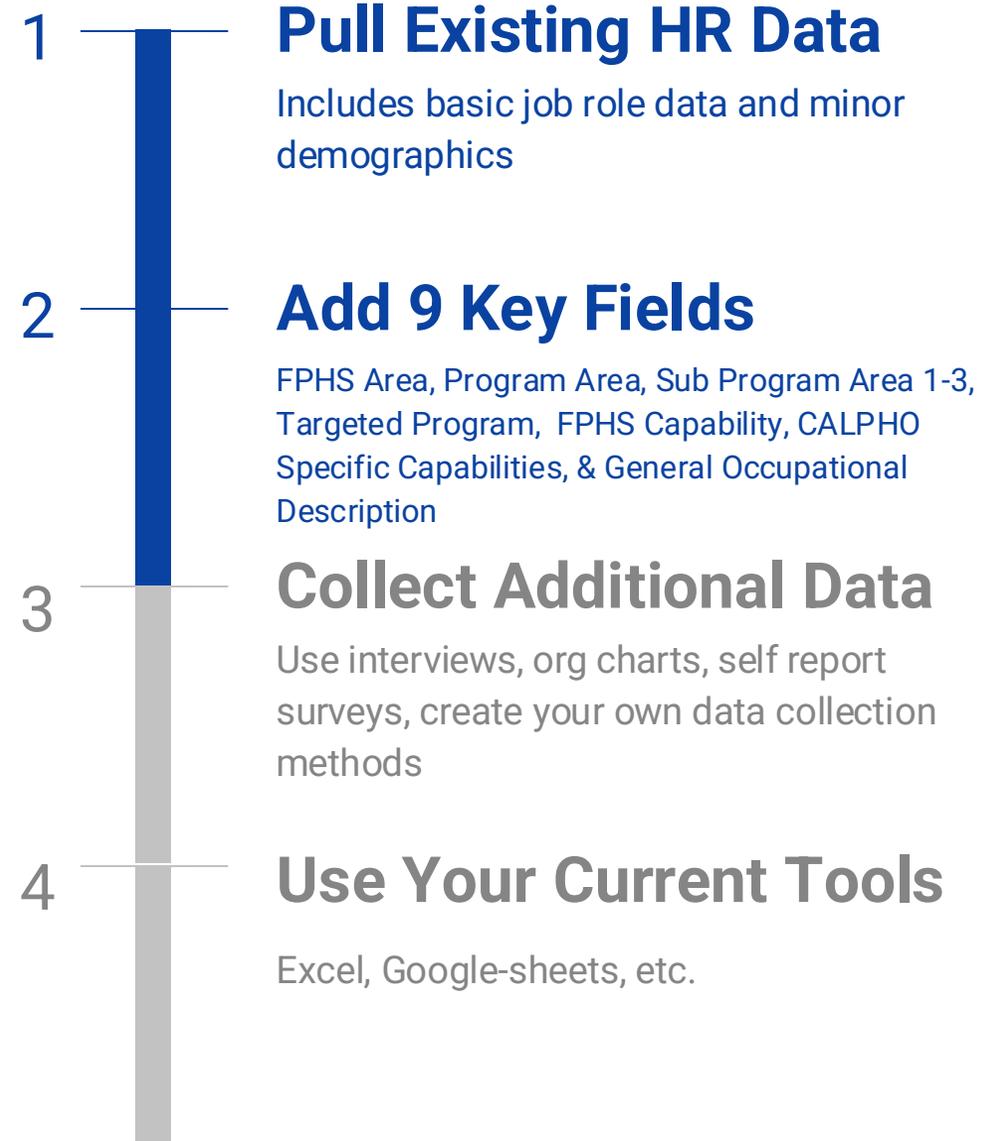

Program & Capability Mapping gives us a common language to describe real infrastructure

How It Works — At Any Level

“Infrastructure misalignments become visible”

- Data systems unused or underutilized
- Capabilities not tracked
- People improvising to fill systemic gaps

Clarity, Visibility, and Functionality

Staff

- See who does what, where, and how
- Track “other duties as assigned,” temporary roles, surge deployments
- Understand capacity by capability, not just job title

Systems

- Reveal how infrastructure is organized
- Link roles to funding, policy, systems
- Spot gaps, duplication, or fragility in operations

Community

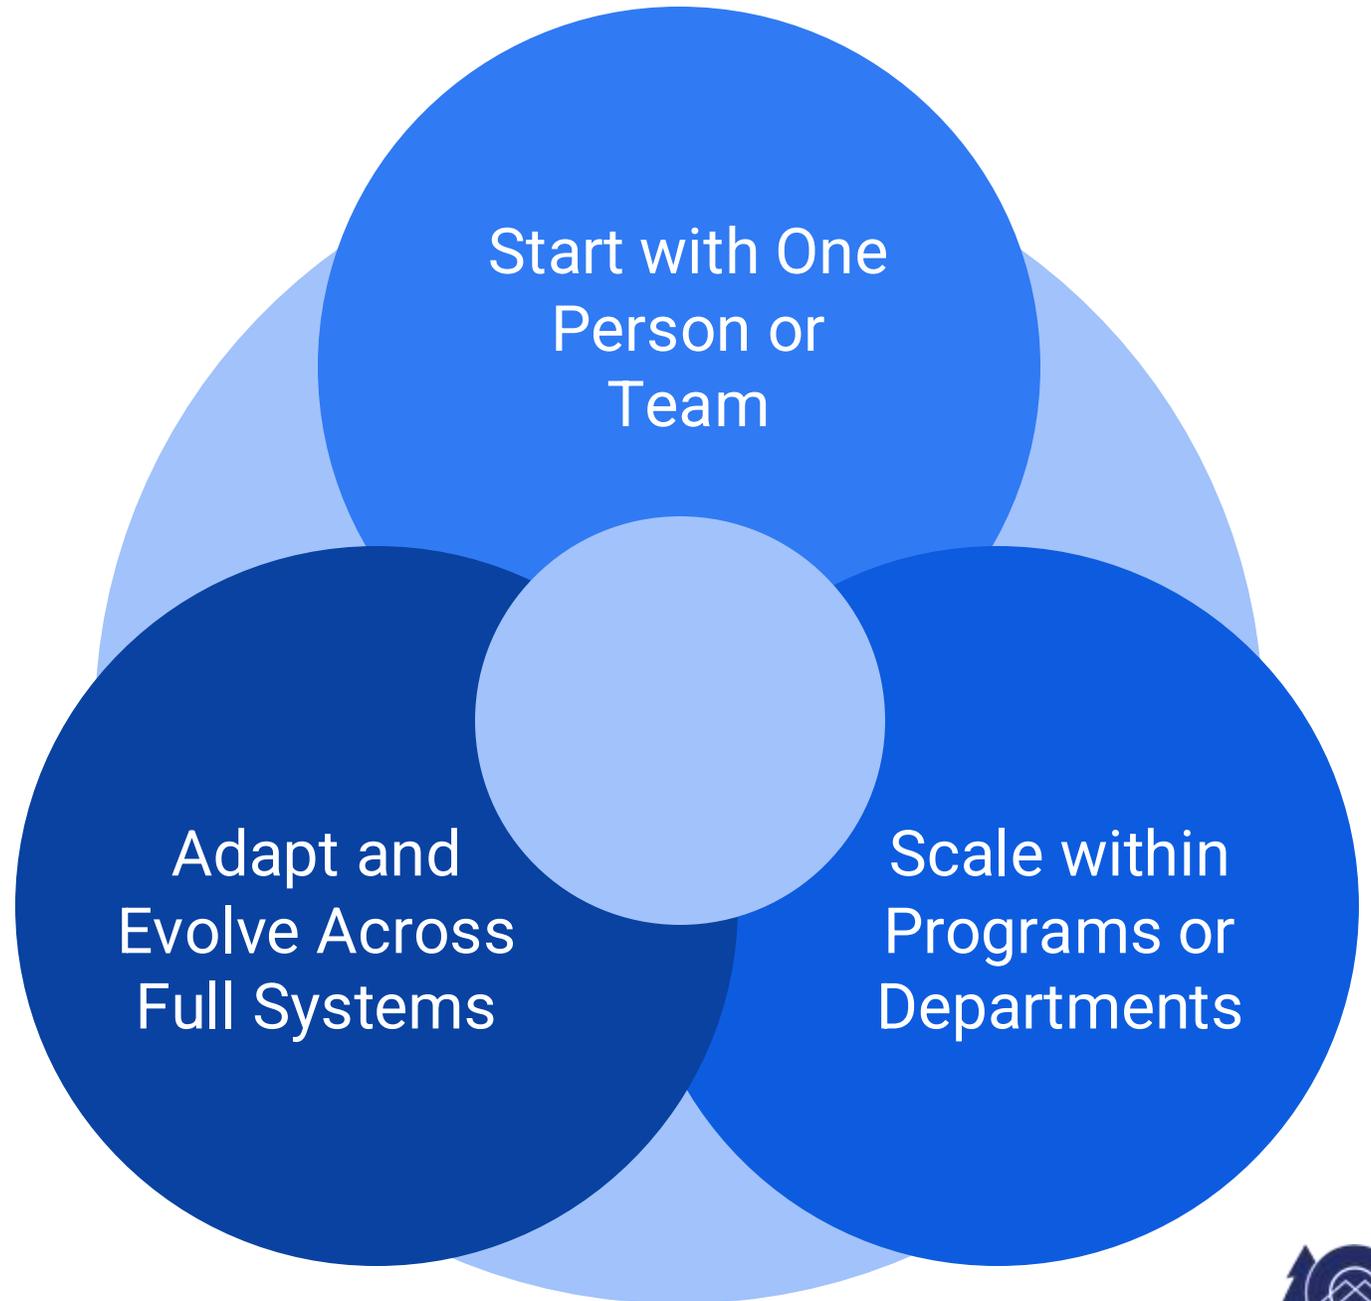

- Align workforce to program delivery
- Share with external partners and funders
- Demonstrate value + capacity beyond staffing counts

From Hesitancy to Action

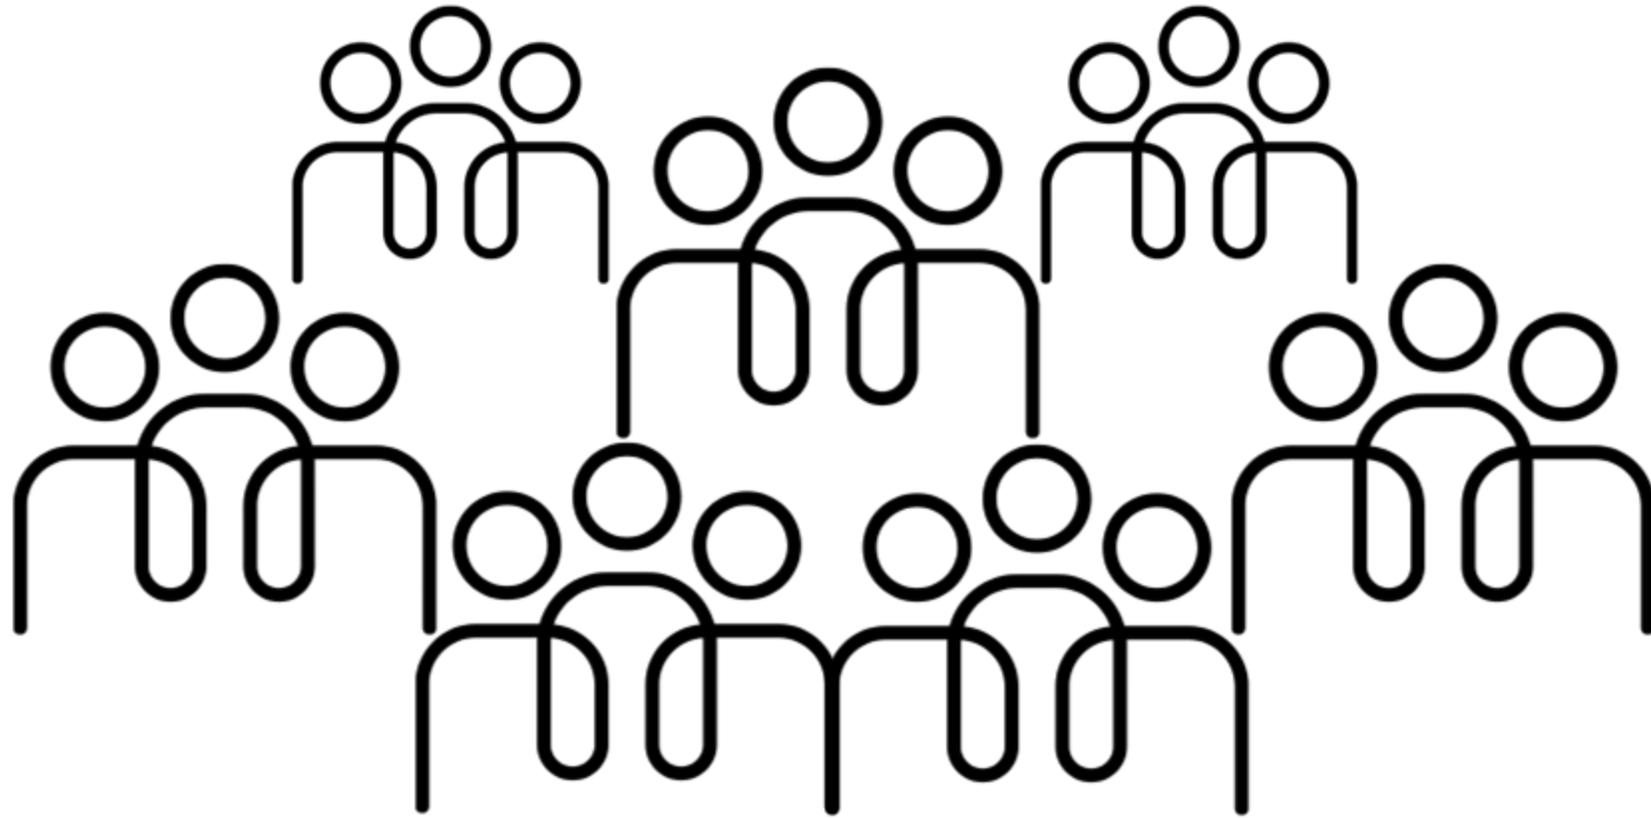

“Workforce data is not risky,
it is necessary”

- We already have what we need to begin
- The framework is scalable, grounded, and flexible
- This isn't a burden, it's a step toward clarity and transformation

Adaptability Is the Path to Sustainability

The Heart of Public Health

Start Where You Are, Use What You Have

- Champions who see the value
- Agencies ready to use the framework
- Coordinated organic growth

“The common language exists.
Now we just need to use it.”

LEVERAGING LOW-COST TECHNOLOGY TO DRIVE WORKFORCE SUCCESS

HOW DCHHS REDUCED VACANCY RATES WITH THE PUBLIC HEALTH WORKFORCE TOOL

Presented By

Katy Womble
Deputy Director - Program Operations

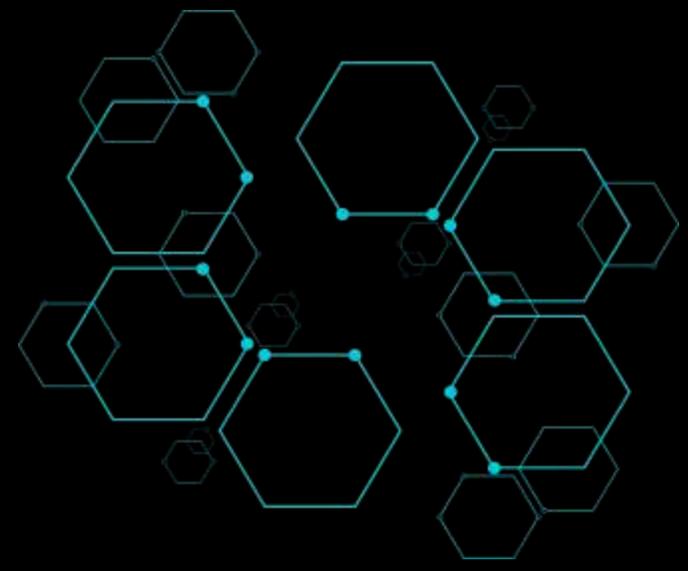

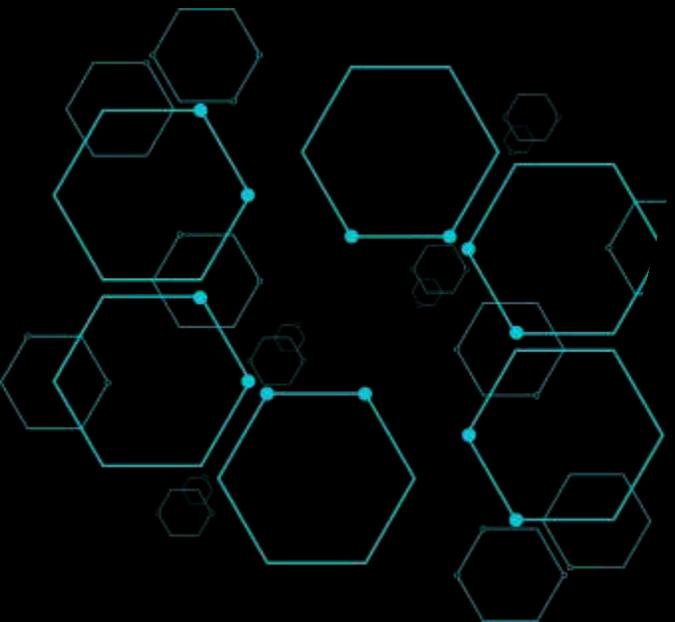

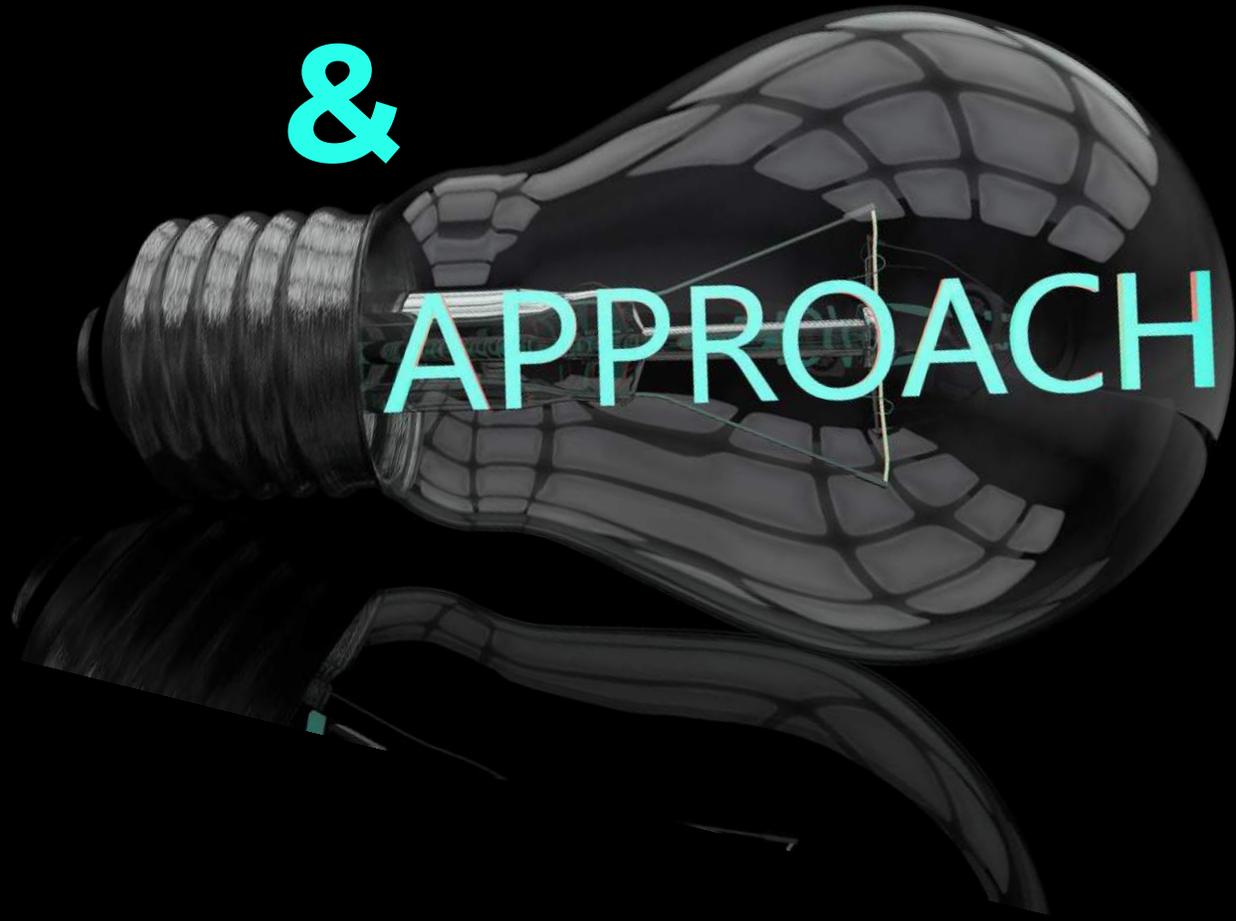

Ganesh Shivaramaiyer
Deputy Director - Finance & Operations

CONCEPT

&

APPROACH

Building the Foundation for the Centralized Data System

Diagnosing the Vacancy Problem through Data

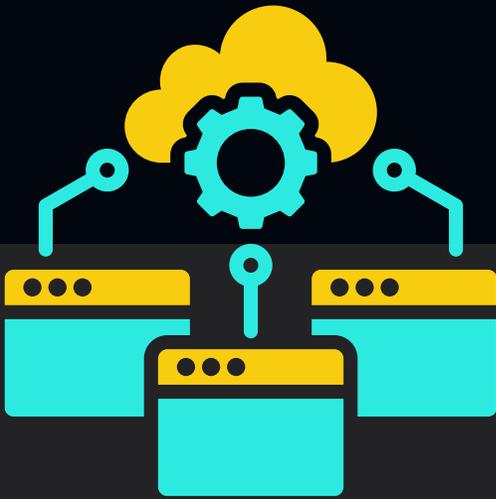

Addressing the Limitations of Centralized HR Systems

Laying the Groundwork for Actionable Insights

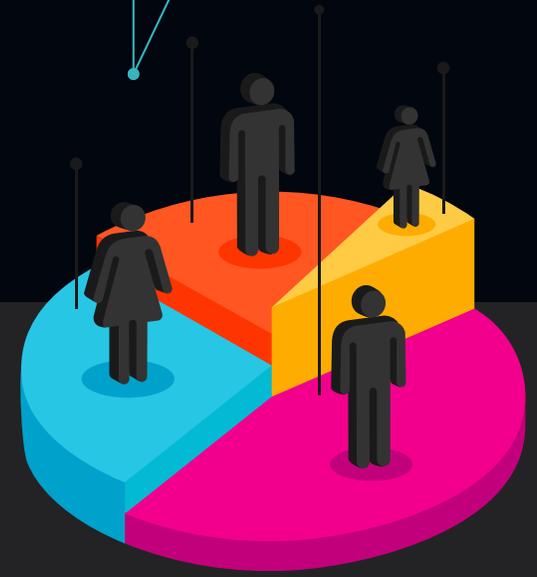

Developing Data Collection Mechanism

Compiling Baseline Data
from County Systems

Partnering with Division
Managers to Validate and
Update Rosters

Populating the
Workforce Tool with Data

 Vacancy Report - Health Admin...
 79 KB

Good morning Ms. Womble & Dr. Huang,

Attached is a listing of vacant positions in your division, per DCHHS' employee records. Please review the list to ensure that information is accurate and provide edits for any exceptions noted. Additionally, indicate by placing a 'Y' or 'N' in the 'Posted' column for the positions that have been posted in Taleo and provide justification in the 'Reason' column for positions that have not been posted.

Please provide us the completed report by COB August 15, 2025.

Thank you,
PH WORKFORCE
Dallas County Health & Human Services

Vacancies by Division: STD/HIV Surveillance and Intervention
Division Head: Shelley Cabrera

Retention and Turnover Data

Retention & Turnover Data

Onboarding Year	Number of Employees
1985 - 1989	1
1990 - 1994	11
1995 - 1999	21
2000 - 2004	25
2005 - 2009	34
2010 - 2014	49
2015 - 2019	77
2020 - 2024	289

7.4 Yrs

Average Length of
Employment at

7.5 Yrs

Previous Month Average

Employee Turnover Rate

19%

Employee Turnover Rate = $\frac{\text{Employees who left}}{(\text{Employees at the beginning} + \text{Employees at the end}) / 2} \times 100$

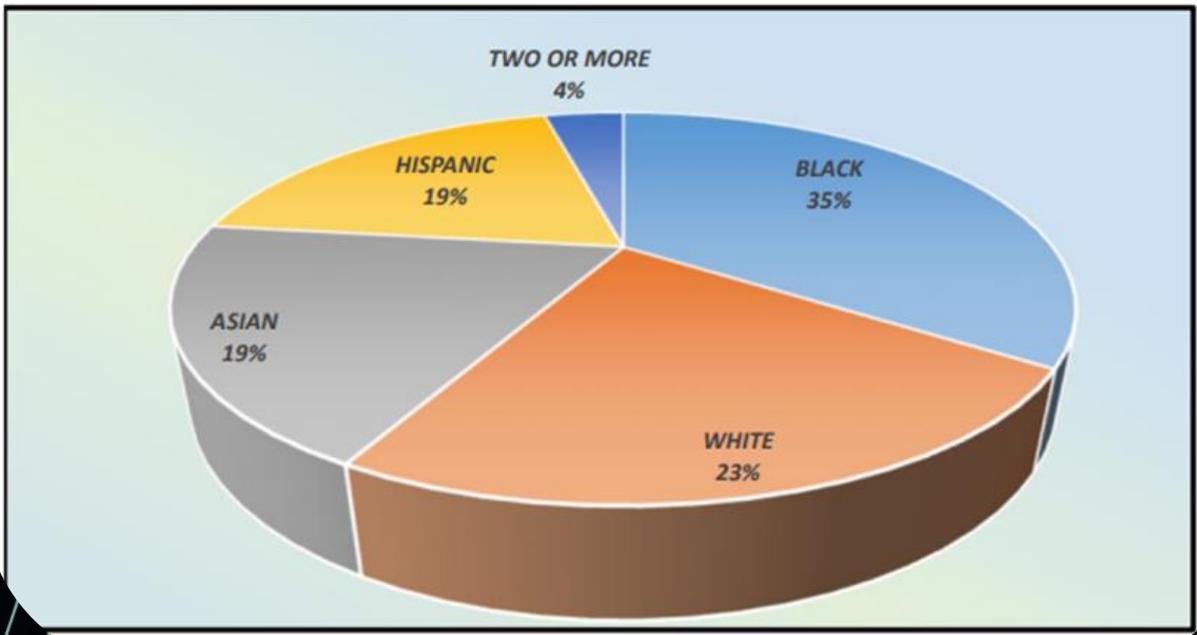

As a general rule, employee retention rates of 90% or higher are considered good. Organization should aim for turnover rate of 10% or less to keep the company's labor force stable.

Workforce Demographics
